

With the **triangle**, it's all round now.
Trilo – the new cutter generation.

Trilo – precise, durable, fast and safe. PROFI and EXPERT cutters from KAISER!

Precise, dimensionally accurate drilling diameters. Perfectly matched to the installation of KAISER boxes.

Faster installation thanks to reliable drilled core ejection.

Recognition mark: Triangle for innovative cutter geometry. Original and exclusive from KAISER.

MADE IN GERMANY

Edge countersink for flush wall box installation.

Specially designed for use in drywalls such as plasterboard, softwood and plywood panels

Highest hole precision/ dimensional accuracy due to fine toothing

PROFI
Ø 68 mm · Art. no. 1081-10
Ø 74 mm · Art. no. 1081-20

Secure slot in the drill chuck.

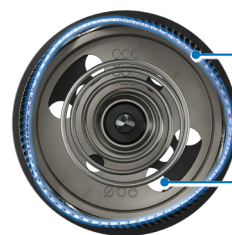

EXPERT
Ø 68 mm · Art. no. 1082-30
Ø 74 mm · Art. no. 1082-40

Maximum service life thanks to virtually wear-free carbide teeth

Multifunctional use in drywalls for increased requirements

The innovative Trilo geometry of the cutter head ensures for an optimised cutting performance and an improved operating life. In combination with the new centring drill, reliable ejection of the drilled core is possible and facilitates fast work.

- Trilo geometry improves the saw cut and service life
- Drilled core is reliably ejected
- Drill diameter matched to box diameter
- Compatible with dust extraction (Art. no. 1088-50) and quick ejector (Art. no. 1083-81)

Saw blade trilobular shaped

holes for dust extraction even with mounted edge countersink
